DETAILED ACTION

This office action is in response to the preliminary amendment filed 1/2/04.

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention: **I)** Species of claims 66-75 disclosed in paragraphs page 5 ll. 8+; and **II)** Species of claims 76-85 disclosed in page 8 ll. 5+.

Species II vs. Species I, notice that the limitations “a housing, a dual polarity magnet, a poppet, a drive member, and a valve member” recited in the species of claims 76-85 are not part of the species of claims 66-75. Thus, the search required for Species II is not required for Species I, restriction for examination purposes as indicated is proper.

The same analysis applies for Species I vs. Species II. The limitations “a pump chamber and a pump element” recited in the species of claims 66-75 are not part of the species of claims 76-85. Thus, the search required for Species I is not required for Species II, restriction for examination purposes as indicated is proper.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 3746

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
